the literature on rural america to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns as a result the real rural america remains much misunderstood neglected or ignored by scholars and policymakers alike in response emery castle offers the changing american countryside a volume

that will forever change how we look at this important subject. Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands. These authors examine the role of non-metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty, industry, the environment, education, family, social problems, ethnicity, race, religion, gender, government, public policy, and regional diversity. The authors are especially effective in demonstrating why rural America is so much more than just agriculture; it is in fact highly diverse, complex, and interdependent with urban America and the international marketplace. Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections. To do so is misguided and even hazardous when one-fourth of our population and ninety-seven per cent of our land area is rural. Together, these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life.

In twelve essays, influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders, institutions, goals, procedures, problems, and traditions involved. The approaches as varied as the subject itself coalesce around the central question of how leaders interact with, transform, or are controlled by the organizations they lead.

I expect the Jossey-Bass handbook will be a basic reference and source of numerous ideas and guidance for practicing managers, leaders, students, and teachers in this field for years to come. It belongs on the bookshelf of every leader and manager of a nonprofit organization. Dennis R. Young, Mandel Professor of Nonprofit Management and Governing, Director, Mandel Center for Nonprofit Organizations, Case Western Reserve University, and his associates have created a book that organizes a complex topic in a sensible and accessible way. Nationally recognized experts expand the reader's perception well beyond narrow managerial issues, but the managerial meat is here too, whether for reference or teaching purposes. A better set of topics and authors on nonprofit leadership and management is difficult to imagine. Bradford H. Gray, Executive Director, Program on Nonprofit Organizations, Poyry Center, Yale University, the leading experts in the nonprofit field describe effective practices in all the distinctive and important functions, processes, and strategies of nonprofit leadership and management based on up-to-date research, theory, and experience. This comprehensive volume offers practical advice on every aspect of managing nonprofit organizations, including board development, strategic planning, lobbying, marketing, government contracting, volunteer programs, fund-raising, financial accounting, compensation and benefits programs, risk management, and much more.
